

Client Profile

Industry: Insurance Technology

Location: Seattle, WA

Specialty: Software Solutions for Insurance Agencies

Challenges

Client needed to migrate their Oracle Databases and corresponding applications infrastructure from on-premises data center to public data center.

Our Solution

Buxton's team meticulously planned and designed a migration solution including backup and recovery. Buxton used industry-leading practices in migrating databases, applications and servers to the public data center without any data loss and with minimum downtime

Business Impact

User were able to access the systems, the next business day without losing any data or the functionality. Post migration, the system performance and stability had been improved drastically.
