

Client Profile

Industry: Hardware and Software/ High-tech

Location: Silicon Valley, CA

Specialty: Cybersecurity and Network Management

Challenges

Client was running their corporate Oracle EBS and other databases on physical hardware. They needed additional hardware capacity to support the growing needs of the company. Customer was looking for creative solution to improve their system capacity, performance, High Availability and be cost efficient

Our Solution

Buxton implemented VMWare Virtualization solution for client's hardware needs. Buxton also architected a better performing solution using VMWare best practices and faster storage. Buxton Solution also included High Availability.

Business Impact

Client enjoyed best performance, systems stability, Security, High Availability. Best of all client didn't have to pay for any additional software license fees.
