

Client Profile

Industry: Data Management/High-Tech

Location: Silicon Valley, CA

Specialty: Storage Management Software

Challenges

Client wanted to migrate their Oracle applications (Oracle EBS, OBIEE, Hyperion, Golden Gate, etc.) infrastructure from Oracle managed Cloud services to Oracle Public Cloud to save money, improve security and stability. Client being a global company, downtime tolerance was limited. Migration had to be completed with minimum interruption to business and without any data loss. There were not many tools available in the industry that could help them with this migration and reconcile the data.

Our Solution

Buxton planned, architected, developed custom tools and migrated data with minimum disruption to business and with no data loss.

Business Impact

Buxton migrated their critical Oracle Database-based applications and their corresponding infrastructure with a minimal down time. Customer enjoyed no data loss, better security and better system performance. Best of all, customer now saves a lot of money every year.
